APPLICATION FOR PERMISSION TO CHANGE THE POINT OF DIVERSION OF THE WATERS OF THE STATE OF NEVADA. 000000000

APPLICATION TO CHANGE THE POINT OF DIVISION OF THE ANDERSON DAM.

Date of first receipt and filing in State Engineer's office AUG.

Return to Application for correction SEP. 11, 1916. Corrected application filed_

The Humboldt Land & Cattle Company, a Corporation, duly organized and existing under and by virtue of the laws of the State of California, and doing business in the County of Eureka, State of Nevada, and whose business address is Beowawe, Eureka County, Nevada, hereby makes application to change the point of diversion of the waters heretofore appropriated and beneficially used as hereinafter shown.

The source of the water supply of the proposed change is l.

Humboldt River.

The quantity of water desired to be changed is 90.5 second feet, or 90.5 cubic feet per second.

The water to be used for irrigation and domestic use. 3.

The water is to be diverted from its following source at the following point, by two dams in NW1 of NE1 Sec. 5, Tp. 31 N.R. 49 E, and a dam to stop the flow down the east channel in NE1 of NW1 Sec. 5, Tp 31 N.R. 49 E, one of the dams to have four gates or more to allow the flood waters to pass by. The other dams to be solid.

The present existing point of diversion, under former appropriation is a solid concrete and masonry dam located just below the Steel County road bridge in SET of SWT Sec. 32, Tp. 32 N.

33

32

31

R. 49 E., M.D.B & M. The water herewith desired to be changed has been beneficially and continuously used upon the following described lands: 60 Acres 48 E. Sec. 36 Tp 33 N.R. 60 48 11 32 129 -11 11 . 12 40 360 11 **k**3 560 11 11 24 11 640 ** (1 25 6.40 * 11 36 320 " 117 35 360 . 11 26 40 # . (1 " 23 520 1 Tp 11 31 N-R 48 E 82 49 . ŧi 6 **T**p 32 N-R 463 íI 200 11 8 490 18 640 17 415 " 640 20 320 21 102 28 640 11 29 482 11 30

The number of acres heretofore irrigated is about 9043. The number of acres proposed to be irrigated is 9043. 7.

Total,

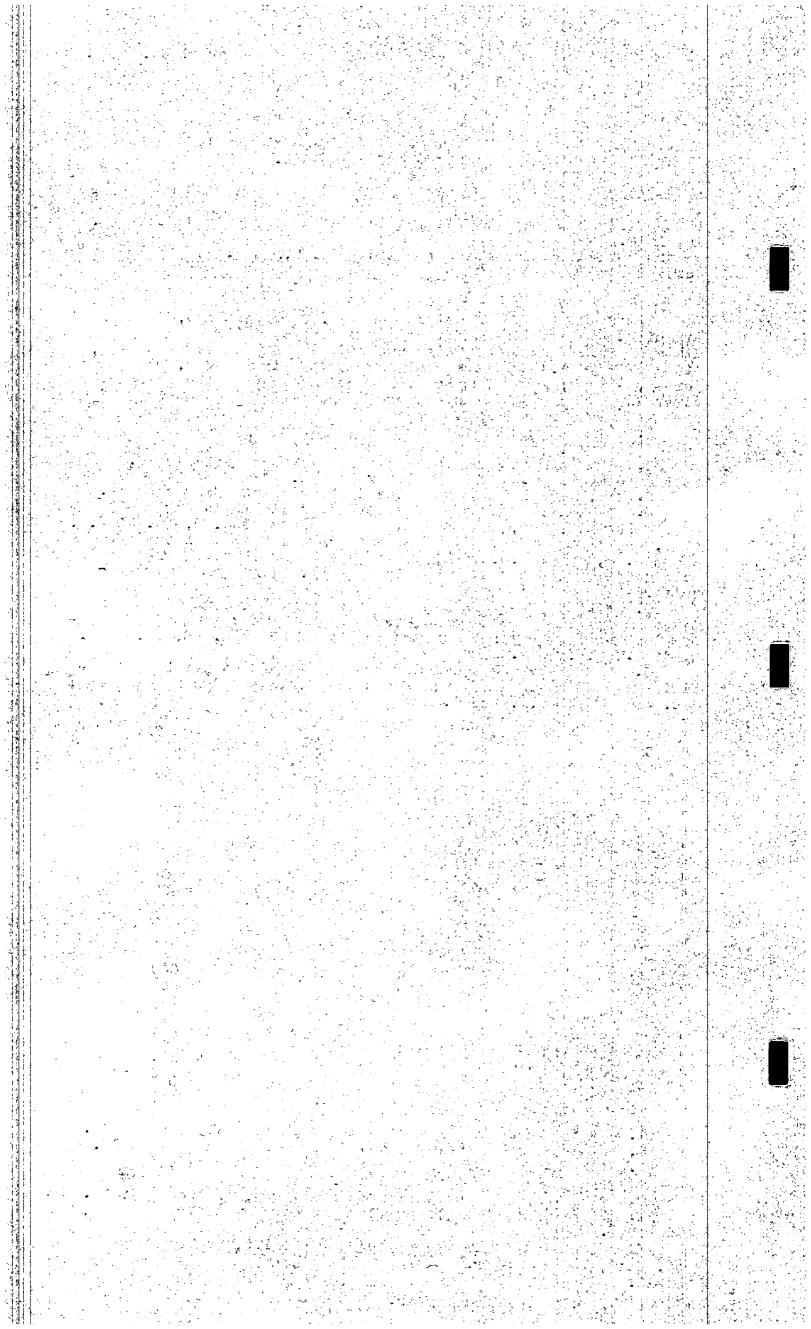

8. Description of land proposed to be irrigated, is the same as that given in answer to question 6.

The estimated cost of proposed works, is about \$3,000. 10.

The estimated time required to construct the works is, 11. two years.

Irrigation will begin about March 1st, and end about 12.

31st, of each year. The water has been used heretofore during the months of March to Oct. 31st of each year.

14. Remarks. The same lands will be irrigated under this change as has heretofore been irrigated. The above change of point of diversion is required on account of the old point of diversion being in the wrong place, being a great cost to maintain, does not afford sufficient water when river is low, backs water upon lands that is valuable for cultivation now making them unfit even for pasture. For the betterment of the entire ranch in general on account of the west side going to be colonized that water must be furnished in the Coyote

Canal during the Summer season when river is low.

For the purpose of letting the flood waters of the river pass by when same is not needed for the ranch irrigation, as well as to afford a reliable passage way for heavy traction engines from one side of the ranch to the other, (The steel bridge being too light a structure to be safe for tractors over the river) and in case the only passage way over the river was ever washed out a second bridge over the tops of the dams would be had, and traffic maintained between the town and Ry and the country cash east of the river. town and Ry and the country cart east of the river.

AMENDED

SERIAL No.4109.

APPLICATION FOR PERMISSION TO CHANGE THE POINT OF DIVERSION OF THE WATERS OF THE STATE OF NEVADA.

APPLICATION TORCHANGE THE POINT OF DIVERSION OF THE ANDERSON DAM. Date of first receipt and filing in State Engineer's Office Aug.16,1916. Returned to Applicant for correction Sep.11,1916. Corrected Application filed OCT-4 1916

The Humboldt Land & Cattle Company, a corporation, duly organized and existing under and by virtue of the Laws of the State of California, and doing business in the County of Eureka, State of Nevada, and whose business address is Beowawe, Eureka County, Nevada, hereby makes application to change the point of diversion of the waters heretofore appropriated and beneficially used as hereinafter shown.:

- The source of the water supply of the proposed change is Humboldt River.
- The quantity of water desired to be changed is 100.43 second feet, or 100.43 cubic feet per second.
- 3. The water to be used for irrigation and domestic use.
 4. The water is to be diverted by the main dam, having Four or Five headgates to be located in the Northwest Quarter of the Northeast Quarter of Section 5, Township 31 North, Range 49 East, M.D.B. & M. Two other smaller dams are to be built to block small channels to force the water into the main or or right channel; one of these smaller dams to be built in a channel just West of the above main dam, and located in the Northwest Quarter of the Northeast Quarter of Section 5. Township 31 North, Range 49 East, and the other dam will be built in what is called the middle channel, or wash, and by means of the main dam, as above described, the diversion is to be made of the said waters of the Humboldt River to furnish water for Beowawe Ditch Number 2 (Called Coyote Canal), and other Canals and Ditches.
- The present existing point of diversion, under former appropriation is a solid concrete and masonry dam located just below the Steel County road bridge in SE1 of SW1 Sec. 32, Tp. 32 N., R. 49 E., M.D.B. & M. 6. The water herewith desired to be changed has been beneficially and

The above lands are mainly irrigated from the waters of the Humboldt River flowing into Beowawe Ditch Number 2, called Coyote Canal. The middle Ditch or Canal irrigating parts of Sections 7-18-19-30-31-32, Township 32 North, Range 49 East, M.D.B. & M., and Railroad Canal irrigating parts of Sections 1-7-12-18-19-30-Township 32 North, Range 49 East, M.D.B. & M. All of the lands above-described will not have their points of diversion changed at all, but depend upon the main Ditch for their water supply, with the assistance of the small concrete dam now in use near the point of diversion of the Coyote Canal. The main dam as above-described will serve the Anderson Canal

The main dam, as above-described, will serve the Anderson Canal, called Beowawe Ditch Number 1, now irrigating an acreage of 3560 Acres as per the acreage shown on Page 70 of the State Engineer's Abstract of Claims to the Waters of the Humboldt River and its tributaries, Edition of 1916.

- The Number of Acres heretofore irrigated is about 10043.
- 8. The Number of Acres proposed to be irrigated is 10043.
- Description of land proposed to be irrigated, is the same as that n in answer to question o.

 The estimated cost of proposed works, is about \$3,000.

 Two Years given in answer to question 6.
- Irrigation will begin about March 1st, and end about Cct. 31st of, each Year.
- The water has been used heretofore during the Months of March to Oct. 31st of each Year.
- Remarks. The same lands will be irrigated under this change as has heretofore been irrigated. The above change of point of diversion is required on account of the old point of diversion being in the wrong place, being a great cost to maintain, does not afford sufficient water when river is low, backs water upon lands that is valuable for cultivation now making them unfit even for pasture. For the betterment of the entire Ranch in general on account of the West side going to be colonized that water must be furnished in the Coyote Canal during the Summer Season when river is low.

For the purpose of letting the flood waters of the River pass by when same is not needed for the Ranch irrigation, as well as to afford a reliable passage way for heavy traction engines from one side of the Ranch to the other, (The steel bridge being too light a structure to be safe for tractors over the River) and in case the only passage way over the River was ever washed out a second bridge over the tops of the Dams would be had, and traffic maintained between the Town and Ry and the country East of the River.

HUMBOLDT LAND AND CATTLE COMPANY. Applicant. Per Charles B. Henderson. P. P. Jones This Sheet Inspected

Engineer

APPROVAL OF STATE ENGINEER.

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit, to change the point of diversion of the waters of Humboldt River, is issued with the express understanding that no prior rights will be affected thereby, and with the further understanding that no new rights are granted herewith. No definite quantity of water is allowed under this proposed change but the maximum amount is limited to that quantity which has heretofore been diverted and beneficially used by means of the Anderson Dam, and other works of diversion which it is now proposed to abandon, at least in part, and which, if any, will eventually be determined to be held under a vested right.

In approving this application it is recognized that, under the description of lands upon which water has heretofore been beneficially used, as set forth in question 6, there is not a total of 10043 acres as stated under questions 7 and 8. It is further recognized that the above mentioned description does not check with the claims of the applicant as enumerated in proof of appropriation No. 00154, and also shown by the Abstract of Claims In and To the Waters of the Humboldt River and Its Tributaries. However, since the description of the lands upon which the water has heretofore been beneficially used and the lands upon which the water is to be used under this proposed change are identical, such description may, and it is hereby made a requirement of this permit that the same shall be designated on a map to be submitted for filing not later than the date set herein for filing the proof of beneficial use.

Actual construction work shall begin on or before June 19th, 1918.

Proof of commencement of work shall be filed before July 19th, 1918.

Work must be prosecuted with reasonable diligence and be completed on or before June 19th, 1920.

Proof of completion of work shall be filed before July 19th, 1920. Application of water to beneficial use shall be made on or before June 19th, 1923.

Proof of the application of water to beneficial use must be filed with State Engineer on or before July 19th, 1923.

WITNESS MY HAND SEAL this 19th day of November, 1917.

The time for filing proof of commencement of work as granted by the within permit is herewith extended to and including July 19,1919, The time for completion of work is extended to and including June 19, The 1921, and the time for filing proof of completion of work is extended per to and including July 19,1921.

Dated this 16th day of July,1918.

Proof of labor field JUL 1.8 1919
